PRO225LM Series

Mechanical Bearing, Linear Motor Stage

Improved second-generation design

Rugged mechanical construction

Direct-drive linear motor for ultra-precise motion

Twelve models with travels from 100 mm to 1500 mm

Vacuum and cleanroom versions available

Available with ThermoComp™ for high-performance in changing environments

The PRO225LM is part of Aerotech's second-generation PRO-LM stage series with many improvements and added features. Enhanced positioning specifications, improved stiffness, and competitive pricing make the PRO225LM stage the ideal choice for both medium and highperformance production applications. The PRO225LM design provides a good alternative to the PRO190LM for applications requiring higher stiffness, higher load capacity, or longer linear travels.

Rugged Mechanical Construction

A long-life recirculating linear guide bearing system and a low-friction sealing solution make the PRO225LM an attractive solution for industrial applications such as laser machining. The basic external construction of the PRO225LM design provides protection from debris while the side-seals prevent dirt and particulates from entering the stage. The curved hard-cover design provides a natural shape that prevents excessive debris from collecting on the stage.

Precision Motion Performance

The PRO225LM series stages are optimized with highprecision, noncontact linear encoders that are protected from debris by the stage sealing system. Precision recirculating linear bearings along with machining and assembly craftsmanship enable excellent geometric performance specifications.

Incremental and absolute encoders are available as standard options and enable minimum incremental motion down to 5 nm and sub-micrometer repeatability.

PRO Series Gen II

Up to:

98% Higher Resolution 46% Better Repeatability

40% Reduction in Error Motions

33% Improved Accuracy

Available with ThermoComp™

Accurate Positioning with ThermoComp

Temperature changes and thermal effects are some of the largest error sources in precision machines. All PRO series stages are available with Aerotech's ThermoComp feature, an embedded temperature compensation unit that guarantees accurate positioning in variable temperature environments. Using this feature protects your process from real-world conditions, even in extreme industrial settings.

Direct-Drive Linear Motor

Aerotech's high-power U-channel linear motors drive the PRO225LM. The ironless forcer coil provides high force with zero cogging for super-smooth velocity and position control. This ironless design is ideal for applications requiring outstanding contour accuracy and smooth velocity profiling. As with all Aerotech linear motor stages, the linear motor has zero backlash, no windup, zero friction, and excellent dynamic responsiveness.

Design and Integration Flexibility

The PRO225LM is designed with many standard features and options that make the design incredibly flexible and allow it to be easily tailored to a specific application. The PRO225LM is available in 12 different models with travels ranging from 100 mm to 1500 mm and speeds up to 2 m/s. Configurable cable management solutions are available for single and multi-axis systems as standard options.

Standard mounting holes for both English and metric optical tables are present in all travels. The tabletop is available with both English and metric mounting patterns and can be ordered with brush attachments to clear any debris that may collect on the stage hard cover. Tabletops with hole patterns that allow the direct attachment of several Aerotech rotary stages are also available.

The PRO225LM series is also available with cleanroom preparation and vacuum versions.

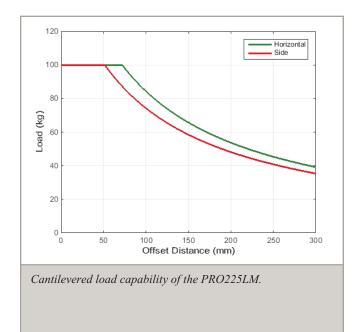

PR0225LM Series SPECIFICATIONS

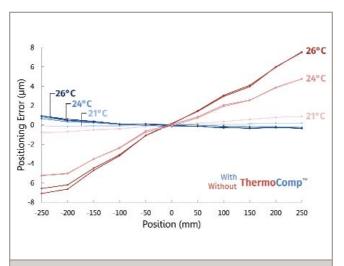

Mechanical Specification		PRO225LM							
Travel		100	150	200	250	300	400		
Accuracy ⁽¹⁾	Standard	±4 μm	±6 μm	±8 μm	±9 μm	±10 μm	±12 μm		
Accuracy	Calibrated	±1 μm	±1 μm	±1 μm	±1 μm	±1 μm	±1 μm		
Resolution (Min. Incremental Motion)		5 nm (-E1 Encoder), 10 nm (-E3 Encoder)							
Bidirectional Re	peatability ⁽¹⁾	±0.3 μm	±0.4 μm	±0.4 μm	±0.4 μm	±0.4 μm	±0.4 μm		
Horizontal Straig	ghtness ⁽¹⁾	±1.5 μm	±2 μm	±2.5 μm	±3 μm	±3.5 μm	±4.5 μm		
Vertical Straightness ⁽¹⁾		±1.5 μm	±2 μm	±2.5 μm	±3 μm	±3.5 μm	±4.5 μm		
Pitch		25 µrad (5.2 arc sec)	29 µrad (6 arc sec)	39 µrad (8.0 arc sec)	44 µrad (9.1 arc sec)	50 µrad (10.3 arc sec)	60 µrad (12.4 arc sec)		
Roll		27 µrad (5.6 arc sec)	29 µrad (6 arc sec)	39 µrad (8.0 arc sec)	44 μrad (9.1 arc sec) 50 μrad (10.3 arc sec)		60 µrad (12.4 arc sec)		
Yaw		27 µrad (5.6 arc sec)	29 µrad (6 arc sec)	39 µrad (8.0 arc sec)	44 µrad (9.1 arc sec)	50 μrad (10.3 arc sec)	60 µrad (12.4 arc sec)		
Maximum Speed	(2)	2 m/s							
Maximum Accel	eration ⁽²⁾	3 g							
Maximum Force Continuous	,	153 N – Standard 251.6 N – With Air Cooling (20 psig)							
Load Capacity ⁽³⁾	Horizontal		100 kg						
	Side		100 kg						
Moving Mass		8.4 kg							
Stage Mass		23.8 kg 25.4 kg 26.9 kg 28.5 kg 30.1 kg 33.3 kg							
Material		Anodized Aluminum							
MTBF (Mean Time Between Failure)		20,000 Hours							

Notes:

- 1. Certified with -PL1 option.

- 2. Requires the selection of an appropriate amplifier with sufficient voltage and current.
 3. Axis-orientation for on-axis loading is listed.
 4. Specifications are for single-axis systems measured 25 mm above the tabletop. Performance of multi-axis systems is payload and workpoint dependent. Contact factory for multi-axis applications.

Measurement data showing successful compensation of thermal related positioning errors at several temperatures using the ThermoComp feature. Results are typical of stage performance with and without ThermoComp.

PR0225LM Series ORDERING OPTIONS

Iravel (Required)
IIavei \	Neuulieu

-0100	100 mm travel stage
-0150	150 mm travel stage
-0200	200 mm travel stage
-0250	250 mm travel stage
-0300	300 mm travel stage
-0400	400 mm travel stage
-0500	500 mm travel stage
-0600	600 mm travel stage
-0800	800 mm travel stage
-1000	1000 mm travel stage
-1200	1200 mm travel stage
-1500	1500 mm travel stage

Mounting Orientation (Required)

	Normal mounting orientation
-MT1	Side-mounted or vertical orientation
-MT2	Inverted mounting orientation

Tabletop(Required)

-TT1	Tabletop with metric dimension mounting
-TT2	Tabletop with English dimension mounting
-TT3	Accessory tabletop with mounting for select rotary stages
-TT4	Tabletop with metric dimension mounting and wiper brushes
-TT5	Tabletop with English dimension mounting and wiper brushes
-TT6	Accessory tabletop with mounting for select rotary stages and wipers
NOTE: -TT1 o	or -TT4 tabletop option required for lower axis of XY.

Feedback (Required)

-E1	Incremental linear encoder, 1 Vpp	
-E2	Incremental linear encoder, 0.1 µm digital TTL output	
-E3	Absolute linear encoder, EnDat 2.2	

Cable Management (Required)

No external CMS, motor/feedback connector bracket on carriage
External CMS for single axis
External CMS for lower-axis of two-axis PRO (XY) assembly
External CMS for lower-axis of two-axis (XZ or XT) assembly
External CMS for upper-axis of two-axis PRO (XY) assembly
External CMS for upper-axis of two-axis (YZ or YT) assembly
External CMS for lower-axis of three-axis (XYZ or XYT) assembly
External CMS for lower-axis of three-axis (XZT) assembly
External CMS for upper-axis of four-axis (XYZT) assembly
External CMS for lower-axis of four-axis (XYZT) assembly

Lifting Hardware (Optional)

-LF Lifting hardw	are
-------------------	-----

NOTE: Lifting option only available on travels 300 mm and greater. Lifting should never be ordered on the upper-axis of an XY set (only order on lower-axis).

ThermoComp (Optional)

TOMB	TI C	1 4 1	41 1		1 1	1 .
-TCMP	InermoComp	integrated	tnermai	compensation,	single or	lower axis

NOTE: An A3200 controller must be used with the -TCMP option.

Metrology (Required)

metrorogy (Required)	
-PL0	No metrology performance plots
-PL1	Metrology, uncalibrated with performance plots
-PL2	Metrology, calibrated (HALAR) with performance plots

PR0225LM Series ORDERING OPTIONS

Integration (Required)

Aerotech offers both standard and custom integration services to help you get your system fully operational as quickly as possible. The following standard integration options are available for this system. Please consult Aerotech if you are unsure what level of integration is required, or if you desire custom integration support with your system.

-TAS	Integration - Test as system Testing, integration, and documentation of a group of components as a complete system that will be used together (ex: drive, controller, and stage). This includes parameter file generation, system tuning, and documentation of the system configuration.
-TAC	Integration - Test as components Testing and integration of individual items as discrete components that ship together. This is typically used for spare parts, replacement parts, or items that will not be used together. These components may or may not be part of a larger system.

Accessories (to be ordered as a separate line item)

Accessories (to be ordered as a separate fille item)		
ALIGN-NPA	Non-precision XY assembly	
ALIGN-NPAZ	Non-precision XZ or YZ assembly	
ALIGN-PA10	XY assembly; 10 arc sec orthogonality. Alignment to within 7 microns orthogonality for short travel stages.	
ALIGN-PA10Z	XZ or YZ assembly with L-bracket; 10 arc second orthogonality. Alignment to within 10 microns orthogonality	
	for short travel stages.	
ALIGN-PA5	XY assembly; 5 arc sec orthogonality. Alignment to within 3 microns orthogonality for short travel stages.	
ALIGN-PA5Z	XZ or YZ assembly with L-bracket; 5 arc second orthogonality. Alignment to within 5 microns orthogonality for	
	short travel stages.
